

RECRUITMENT AND RETENTION

Supporting Early Career Development

Rationale

The retention of early career teachers has fallen across England in recent years¹ with the most significant problem being in London, where 11,000 of the teachers who joined the profession in 2010 have already left despite pupil numbers rising considerably².

In January 2019, the DfE published a Teacher Recruitment and Retention Strategy³. The strategy's central reform is the introduction of Early Career Framework, which will underpin an entitlement to 'a fully-funded, 2 year package of structured support for all early career teachers' including 5% funded off timetable time in the second year of teaching.

In order to support our new teachers and attenuate the numbers of our teachers leaving the profession prematurely, it is necessary to ensure that Attain schools provide early career development opportunities to all teachers so they can continue confidently in their careers. In preparation for the roll-out of the new early career framework in 2021, it is a wise time to invest in our early career teachers.

The Merton NQT+1 Programme

During planning for the Attain CPD programme for 2019-20, meetings between Merton School Improvement, Teach Wimbledon and the Merton Special Teaching Alliance revealed that there would be interest in creating a specific development route for teachers in their second year of teaching, with separate options for primary and secondary colleagues.
